

Eaton All-Time Winning Percentage

Spring

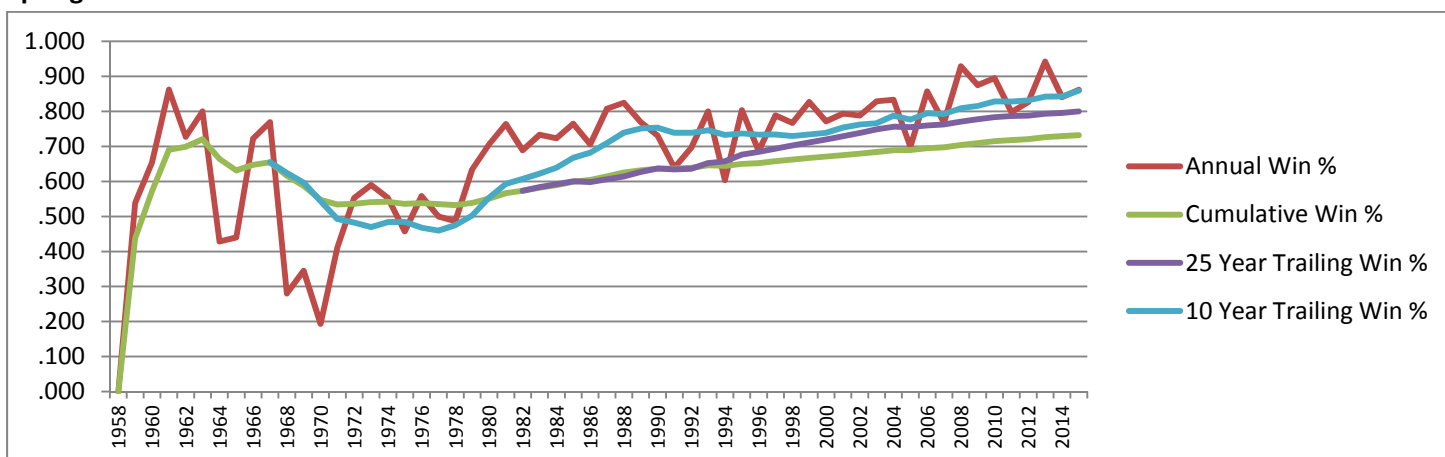

Did You Know? There have been two spring seasons since the 1970's in which the Reds won 75% or less of their games, and in both of these years (1991 and 1996), the Reds still advanced to the State Championship Game.

Summer

Did You Know? There have been two summer seasons since the mid-1980s in which the Reds won fewer than 65% of their games, and in both of the following springs (1995 and 2006), the Reds responded by advancing to the State Championship Game, winning the State Championship in '95.

Spring & Summer Combined

Did You Know? With each passing year, the Reds have continually faced more and more 5A schools/graduate teams, including 20 games vs. teams comprised of nearly entirely graduates in 2014 and 2015—the Reds have lost to only 4 non-graduate teams in spring/summer since late July 2012.
